## Projects

### codeBreaker

- A version of the classic puzzle board game Mastermind
- The player may try to guess a code set by the program, or create a code and have an algorithm solve it
- The game is customisable to varying levels of difficulty
- Solution logic in JavaScript, DOM manipulation in jQuery

### hangMovie

- A hangman-type game in which the player chooses letters to guess a film title
- Player enters the name of an actor, puzzle is dynamically generated via call to NetflixRoulette API
- Developed using JavaScript

## Work History
